

# STAKOOOR 2.0

## Return of the Royalties

**CONTACT US**

via BOLT, discord or  
at XLabs.so to start  
rewarding your  
buyers that pay  
royalties!

### Royalty-gated staking

Stakooor 2.0 features an optional royalty-gated emission where NFTs traded without respecting creator royalties will be set to 0 emissions and displayed with a notice in the stakooor interface.

These NFTs are displayed at the top of the staking panel so they can be quickly noticed and the debts repaid.

### See and pay royalty debts instantly

Allow your holders to repay any royalty debts easily inside the Stakooor 2.0 app, and they'll receive full staking rewards in addition to the emissions boost that you choose!

100% of all repaid royalty debts go straight to the original intended creators (the split is carried out according to the stored on-chain metadata).

### Emissions boost for paid royalties

Reward holders who purchase with full creator royalties, and those who choose to repay after the initial purchase with a configurable token emission.

E.g. 1.25x emission for 1 week after full royalties paid, or 2x for 24 hours

All existing Stakooor clients will be upgraded to Stakooor 2.0 for FREE!
